

```
1 // object creation
2 let person = {
3   name: "John",
4   age: 30,
5   occupation: "Developer"
6 };
7
8 // adding methods to the object
9 person.sayHello = function() {
10   console.log("Hello, my name is " + this.name);
11 };
12
13 person.showAge = function() {
14   console.log("I am " + this.age + " years old.");
15 };
16
17 // calling the methods
18 person.sayHello();
19 person.showAge();
20
```
