```javascript
1   // Get the button element
2   var btn = document.getElementById("myBtn");
3
4   // Add an event listener to the button
5   btn.addEventListener("click", function(){
6     // Get the header element
7     var header = document.getElementById("header");
8
9     // Change the text of the header
10    header.innerHTML = "Button was clicked!";
11
12    // Change the background color of the window
13    window.document.body.style.backgroundColor = "lightblue";
14  });
15
```
